INFORMATIVE OVERVIEW

GEOCHROMOTHERAPY

The Geocrom® Method is a new vision that contemplates the therapeutic properties of Geometry and Color, applied simultaneously, containing specific healing frequencies within the 77 codes or archetypes of Geocromotherapy. Human beings are responsive to the codes of sacred Geometry and the frequencies of Light, and therefore we all resonate with those forces of universal harmonic growth within the Unified Field or network that unifies us. These Geocrom photosensitive gelatin filters were created by Marta Povo in 1994 as 'active principles' with deeply healing and evolutionary soul connotations.

The seventy-seven archetypes of Geocromotherapy (checked a priori for each person) awaken the ability to free ourselves from environmental conditioning, treat cellular memory and balance acquired programming, enhance emotional intelligence and the right hemisphere, activate the human energy flow, harmonize psychosocial relationships, and strengthen the ability for mindfulness. The 77 distinct codes mainly affect behavioral patterns inherited, learned, or recorded in our particular soul registry, and the complex psychological and somatic dynamics of each individual, activating the spiritual path, health, psycho-spiritual empowerment, fullness, and conscious evolution.

Geocromotherapy has four basic therapeutic applications:

1 · Application of the 77 Codes in INDIVIDUAL THERAPY or spiritual healing, following prior soul and energetic testing, by projecting the archetypes onto chakras and acupuncture points (without needles and with light), facilitating deeper vision and self-knowledge of the unconscious, in profound private sessions that affect the balance of cellular, etheric, and soul memory.

2 · Application of all the archetypes in seawater dilutions, using the 77 ENCODED GEOCROM ESSENCES and the 10 Fistera formulas, which replace or complement individual therapies on the couch. It is a new floral therapy based on the frequencies of Geometry and Color, prepared to be taken in drops of seawater – a marine substrate encoded or programmed with synergistic formulas or combinations of Geocrom codes – today considered a very practical, direct, profound, and also popularly understandable healing.

3 · The application of certain Geocrom Archetypes for HABITAT HEALING, understanding our space or home as a living entity that alters or benefits our health, development, and fulfillment. Private or work spaces can be energetically corrected and also enhanced or sublimated through the 28 Geocrom Archetypes of Habitat Medicine.

4 · Practicing LUMINOUS GEOMETRY MEDITATIONS, either individually or guided and channeled live by Marta Povo, many already available on her YouTube channel. This is considered a valuable therapeutic practice of mindfulness, soul healing, and consciousness training.

According to many Geocromotherapy TESTIMONIALS, this method is generally considered an interesting psycho-soul diagnostic system for the human being, but above all, it is an important tool for self-healing, energetic and soul healing, and also for the harmonization of habitat and environment. A synthesis of the therapeutic effects observed for more than two decades by therapists and patients is as follows:

- The practice of the Geocrom method is a great tool for testing, checking, or analyzing energetic, psychological, soul, or existential aspects.

- The Geocrom vision is an innovative quantum and integrative healing dynamic (body, mind, soul, and environment) and is systemic, because when one heals, one's entire environment or relational system heals.
- Therapeutic work with the Geocrom archetypes is an excellent method of preventive medicine, activating healthy life cycles and also strongly educating the psyche and character in terms of health.
- It is an excellent tool for self-knowledge, self-review of the unconscious, guiding the ego, exploring the psyche, and enhancing the ability to observe and pay attention to what we live, expanding consciousness.
- The Geocrom symbols and codes activate and amplify lucidity, clarity of mind, coherence, creative capacity, inner harmony and peace, and adaptability to life and environment.
- The Geocrom archetypes facilitate the optimization of internal resources and activate each Being's self-healing.
- These universal codes mainly affect limiting memories and behavioral patterns learned or recorded in our particular registry, and work on cellular and etheric memory.
- They are a subtle and effective means of healing the soul (origin of psyche, energy, and body), and these harmonious patterns or geometric archetypes raise consciousness levels and drive the personal and spiritual development of the Human Being.
- The Geocrom archetypes awaken the ability to free ourselves from conditioning environments and the complex psycho-energetic dynamics between individuals, harmonizing bonds and social, personal, or professional relationships.
- They treat cellular memory, family and ancestral issues, repetitive codes, balancing chromosomal, organic, and energetic programming.
- They foster and educate emotional intelligence, the right hemisphere, sensitivity, intuition, and creativity, as well as the synchronization of both hemispheres — rational and intuitive — as a new unified and integrated way of seeing the world.
- All Geocrom applications activate the ability to synchronize and tune with the natural laws of the expansive Universe or network that surrounds us, flowing with Life with fewer resistances.
- The Geocrom archetypes (diagnosed a priori for each person) are etiological and act on the energetic causes that provoked alterations in our cellular memory, sufferings, and experiential records.

Geocrom and Geocromotherapy is a registered trademark: TM-3.638.318 / X

Training and workshops are organized by the Geocrom School of Barcelona and are mainly facilitated by Marta Povo, creator and developer of the method, in various regular teachings and residential retreats, or in ONLINE courses and seminars, notably the M.A.S.H. seminar.
